PATENT

Serial No. 10/573,719

Amendment in Reply to Final Office Action of March 13, 2008

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.(Currently Amended) A method of position determination in a radio system, the method comprising the acts of:

multiplying a signal received by a multiplier with a carrier signal from a carrier generator to form a mixed down signal;

correlating the mixed down signal with a replica signal from a code generator to form a correlated signal;

processing the correlated signal with an optimization function comprising an exponential term in combination with a second term to form an output signal that provides a position measurement in indoor environments with multiple diffuse reflections; and

feeding back the output signal to control the carrier generator and the code generator for improving accuracy of the position measurement;
